TO DISREGARD TEACHERS IS TO DISREGARD THE FUTURE

 Only education can change Brazil, reduce inequalities and guarantee a better future for all.

However, the **REFORMS OF THE MICHEL TEMER ADMINISTRATION** are disregarding the most important player in this game: teachers.

The social security and labor reforms, as well as unrestricted outsourcing are having a direct effect on education and the classroom.

Provisional Presidential Decree **746 (SECONDARY EDUCATION REFORM)** lowers teacher training standards, destroys teacher training courses and compromises the quality of education/teaching, allowing any person with "recognized knowledge" in some area to be hired.

The movement **NO POLITICS IN SCHOOLS** is threatening the freedom of teaching and critical and democratic pedagogical projects.

In turn, the **SUSPENSION OF PRECEDENT 277** of the Superior Labor Court puts an end to the applicability after abrogation of collective bargaining rules, taking away teachers' rights, which were won after decades of struggle.

We cannot allow education to disappear from our country. Mobilize your school, your union, your city, and let's take to the streets.

To disregard teachers is to disregard the future.

Campaign against the deprofessionalization of teachers. In favor of valuing education, in defense of rights and against the reforms.
